

DMX512/RDM PUSH DIM/CCT

Intelligent Tunable White LED Driver (Constant Voltage)

- The housing is made from V0 flame retardant PC materials from SAMSUNG/COVESTR0.
- The clamshell design and screwless type for strain-relief. The design of dismountable end cap allows you to adjust the length of housing depending on your needs.
- Change DMX addresses, PWM frequency, and other parameters via the APP and achieve data synchronization between the driver and the APP.
- Support RDM protocol.With soft-on and fade-in dimming function, enhancing your
- visual comfort.Dimming from 0-100%, down to 0.01%.
- Comply with the EU's ErP Directive, networked standby<0.5W.
- Overheat, over voltage, overload, short circuit protection and automatic recovery.
- Suitable for Class I / II / III indoor light fixtures.
- Normal service life can reach 100,000 hours.
- 5-year warranty (Rubycon capacitor).

Technical Specs

Model		LM-24	0-24-G2M2				
	Output Type						
Features	Dimming Interface	Constant voltage					
	Output Feature	DMX512/RDM, PUSH DIM/CCT Isolation					
	Protection Grade	IP20					
	Insulation Grade	Class II (Suitable for class I/ II /III light fixtures)					
	Output Voltage	24Vdc					
OUTPUT	Output Voltage Range	24Vdc 24Vdc±0.5Vdc					
	Output Vottage Nange	Z4Vdc±U.3Vdc Max. 10A					
	Output Power	Max. 10A Max. 240W					
	Dimming Range	0~100%, down to 0.01%					
	Ripple(maximum)	200mVp-p					
	Voltage Accuracy	±5%					
	PWM Frequency	<pre>\$22000Hz (NFC setting range 300-20000Hz)</pre>					
	DC Voltage Range	200-250Vdc					
	AC Voltage Range		220-240Vac				
	EoFv	EoFv=99.6%					
	Input Voltage	220-240Vac					
	Frequency	0/50/60Hz					
	Input Current	Max. 1.18A/230Vac					
INPUT	Power Factor	PF>0.99/230Vac, at full load					
	THD	THDs5%@230Vac, at full load					
	Efficiency (Typ.)	94%					
	Inrush Current	Cold start 55A (Test twidth=1200us tested under 50% Ipeak)/230Vac					
	Anti Surge	L-N: 2KV					
	Leakage Current	Max. 0	Max. 0.5mA				
	Working Temperature	ta: -20	~ 45°C tc: 86°C				
	Working Humidity	20 ~ 95%RH, non-condensing					
ENVIRONMENT	Storage Temperature/Humidity	-40 ~ 80°C/10~95%RH					
	Temperature Coefficient	±0.03%/°C (0-50°C)					
	Vibration	10-500Hz, 2G 12min/1cycle, 72 min for X, Y and Z axes respectively					
	Overload Protection	Shut de	Shut down the output when rated power>102%, auto recovers				
DRATECTION	Overheat Protection	Intelligently adjust or turn off the output current if the PCB temperature >110°C, and recover automatically					
PROTECTION	Overvoltage Protection	Shut down the output when voltage>28V, and recover automatically					
	Short Circuit Protection	Enter h	Enter hiccup mode if short circuit occurs, and recover automatically				
	Withstand Voltage	I/P-0/	I/P-0/P:3750Vac				
	Insulation Resistance	I/P-0/	P:100MΩ/500VDC/25	°C/70%RH

OTHERS	Weight(N.W.)	555g±10g					
UTHERS	Dimensions	380×49.5×30mm[L×W×H]					

The driver is suitable for connecting resistor current-limiting LED fixture (e.g. LED strip). The inrush current will be dozens of times increased if connecting built-in constant current IC current-limiting LED fixtures, the driver will activate the overloaded protection (hiccups flickering). When you order, please remark controlling the constant current LED fixture (e.g. MR16 lamp, underground light, LED wall washer, constant current LED strip, etc.), so that we can prepare them with special procedures.

Product Size

Unit: mm

Wiring Diagram

DMX512/RDM PUSH DIM/CCT

Four-wire LED connection

Push DIM/CCT

- On/off control: Short press.
- Stepless dimming: Long press.
- With every other long press, the brightness goes to the opposite directionDimming memory: Brightness will be the same as previously adjusted
- when turning on again.
- ССТ
- Color temperature adjustment: Long press.
- With every other long press, color temperature go to the opposite direction.
- Color temperature memory: Color temperature will be the same as previously adjusted when turning on again.
- * Applicable to brightness adjustment, color temperature adjustment and brightness/CT adjustment respective of Push DIM/CCT connection.

Protective Housing Application Diagram

DIM

Fix wires

Use a screwdriver to pry up the protective housing at the edge of the wire fixing board. Then connect to the wires as the diagram shows and press down the wire fixing board.

Remove protective housing

Press down the back side of the protective housing and move it from side to side to remove it.

Installation Precautions

Please do not stack the products. The distance between two products should be >15cm so as not to affect heat dissipation and the lifespan of the products.

Please not place the products on LED drivers. The distance between the product and the driver should be >15cm so as not to affect heat dissipation and shorten the lifespan of the products.

Note: The temperature within the installation area should be within the working temperature range of the products. Please do not install products inside LED fixtures to avoid temperature exceeding the working temperature that may affect the product lifetime.

Use the NFC Lighting APP

Scan the QR code below with your mobile phone and follow the prompts to complete the APP installation (According to performance requirements, you need to use a NFC-capable Android phone, or an iphone 8 and later that are compatible with iOS 13 or higher).

* Before you begin setting the parameters of the driver, please make sure the driver is powered off.

Read/Write the LED driver

Use your NFC-capable phone to read LED driver data, then edit the parameters and they can be directly written to the driver.

1. Read the LED driver

On the APP home page, click [Read/Write LED driver], then keep the programmer's sensing area close to the NFC logo of the driver to read the driver parameters.

2. Switch the dimming interface

On the page of "Edit parameters", click [Dimming interfaces] to switch to the needed dimming interface: CT, DIM (1 address for 1 channel / 1 address for 2 channels / 2 addresses for 2 channels).

1 address for 1 channel

1 address for 2 channels

2 addresses for 2 channels

0

0

0

3. Edit parameters

Click [Parameters] to edit DMX address, PWM frequency, dimming curve, and more advanced parameters.

4. Write to the driver

After completing the parameter settings, click [Write] in the upper right corner, and keep the programmer's sensing area close to the NFC logo of the driver, so the parameters can be written to the driver.

Use with RDM Editor

The DMX driver can work with a DMX address programmer that follows the standard RDM protocol. It is recommended to use LTECH RDM Programmer (Model: WiFi-RDM01), which can achieve more functions such as remote browsing and parameter setting. Wiring diagram as below:

Mobile App Interface for the RDM Programmer

Download the App with your mobile phone and connect the RDM Programmer successfully, then you are allowed to set parameters through the APP. Please refer to the WiFi-RDM01 manual fo more details.

Transportation and Storage

1. Transportation

Products can be shipped via vehicles, boats and planes.

During transportation, products should be protected from rain and sun. Please avoid severe shock and vibration during the loading and unloading process.

2. Storage

The storage conditions should comply with the Class I Environmental Standards. The products that have been stored for more than six months are recommended to be re-inspected and can be used only after they have been qualified.

Attentions

- Product installation and commissioning should be done by a qualified professional.
- LTECH products are and not lightningproof non-waterproof (special models excepted). Please avoid the sun and rain. When installed outdoors, please ensure they are mounted in a water proof enclosure or in an area equipped with lightning protection devices.
- Good heat dissipation will prolong the working life of products. Please ensure good ventilation.
- Please check if the working voltage used complies with the parameter requirements of products.
- The diameter of wire used must be able to load the light fixtures you connect and ensure the firm wiring.
- · Before you power on products, please make sure all the wiring is correct in case of incorrect connection that causes damage to light fixtures.
- If a fault occurs, please do not attempt to fix products by yourself. If you have any question, please contact your suppliers.
- * This manual is subject to changes without further notice. Product functions depend on the goods. Please feel free to contact our official distributors if you have any question.

Warranty Agreement

- Warranty periods from the date of delivery: 5 years.
- Free repair or replacement services for quality problems are provided within warranty periods.

Warranty exclusions below:

- Beyond warranty periods.
- Any artificial damage caused by high voltage, overload, or improper operations.
- Products with severe physical damage.
- Damage caused by natural disasters and force majeure.
- Warranty labels and barcodes have been damaged.
- No any contract signed by LTECH.
- 1. Repair or replacement provided is the only remedy for customers. LTECH is not liable for any incidental or consequential damage unless it is within the law. 2. LTECH has the right to amend or adjust the terms of this warranty, and release in written form shall prevail.
